

### Product profile

The Momentum AM CPI +5% Global Fund is a fully discretionary portfolio with a real return performance objective. Investments are diversified across a range of asset classes, including global. The fund is structured to comply with Regulation 28 of the Pension Funds Act. This portfolio is also available as a segregated mandate.

### Investment strategy

As appropriate strategic asset allocation is key to achieving the objectives of the fund, much emphasis is placed on this. The strategic asset allocation most likely to deliver returns in line with inflation is determined using quantitative modelling and fundamental processes. Once the strategic asset allocation has been determined, tactical deviations from the strategic asset allocation are implemented to take advantage of opportunities in the market and enhance returns. Downside volatility is specifically managed through appropriate protection strategies. Proprietary quantitative stock selection models are used to generate alpha on market returns.

### Performance objective

The portfolio seeks to achieve a return of CPI +5% over a rolling three year period.

### Fund details

Inception	3 November 2003
Minimum investment size	No minimum investment
Termination	30 days written notice
Market value	R 0.14 million
<b>Benchmark</b>	
CPI+5% p.a. (1 month lag)

Anglo American Plc	2.35	0.69
STANDARD BANK GROUP LIMITED	2.25	0.66

## Quarterly commentary as at 29 September 2017

### Economic and market overview

Due to the fund size becoming too small for the fund to be managed on an individual security level, the fund is now substantially invested in the Momentum Capital Enhancer Unit Trust, which has similar investment objectives to the fund. A small portion of the fund is being kept in cash for liquidity purposes.
